Kindergarten Readiness Indicators Checklist

The Arkansas Department of Education has developed a list of Kindergarten Readiness Indicators. This list of thirty-eight (38) indicators identifies skills and knowledge that will help your child be prepared for that special day, *going to kindergarten*.

To help you and your child get ready for kindergarten, a calendar of family activities has also been published. The activities in the calendar focus on the Kindergarten Readiness Indicators.

Many families with three to five year old children enrolled in an early childhood program have already received the calendar from the program. If you have not received your copy of the Getting Ready for Kindergarten calendar of family activities, ask the program director for one, or contact the Arkansas Division of Child Care and Early Childhood Education.

Suppose you want to focus on specific indicators with your child. Note that after each indicator on the checklist a month is listed. Simply go to the Family Calendar, turn to the month listed, and you will find activities and ideas for that indicator. Thus the checklist and the calendar can both be tools for helping you and your child get ready for kindergarten.

Sometimes parents are not sure how to determine if their child is achieving the kindergarten readiness indicators. To assist you in this, a KRIC Instructional **LINK** for Parents/Families has been developed. Each readiness indicator is listed, followed by a few examples of what to observe. We also left space to note examples of what behaviors or skills were observed.

The Kindergarten Readiness Indicators Checklist (KRIC) has also been aligned with the Qualls Early Learning Inventory (QELI). This inventory will be completed on each kindergarten child during the first few weeks of the school year. Information from the QELI is to be used to focus instruction and improve achievement in kindergarten.

The QELI is simply a list of items to be observed. The **LINK** lists the indicators, plus a number of examples of observable behaviors. These examples give parents/families ways to observe and encourage these kindergarten skills.

Remember this! The checklist is NOT a test. It is a tool to help you see all of the things your child can do that will help him or her make the transition to kindergarten. **Your child will NOT be required to have achieved all of the indicators prior to enrolling in kindergarten.**

Definitions

Early Childhood Benchmark (EC Benchmark)

A level of performance that can be supported through observations, descriptions and documentations of a child's performance or behavior, and by samples of a child's work. Some educators may also refer to these as "learner outcomes".

Work Sampling System (WSS)

Work Sampling System is an authentic performance assessment system. Its purpose is strengthen student achievement and motivation, assists teachers in instructional decision-making, and serves as an effective means for reporting children's progress to families, educators and the community.

Kindergarten Readiness Indicators (KRIC)

The Kindergarten Readiness Indicator Checklist (KRIC) is a list of skills that will give parents/guardians and teachers a place to begin in preparing the child for entering kindergarten. While mastery of any or all of these skills identified is not required for admission to kindergarten, these indicators will help children enter kindergarten with confidence.

ADE Curriculum Frameworks (ADE Frameworks)

The broad goals and standards of an entire system of education, while giving the local school district the freedom to develop a specific program to address the Framework for each grade level.

Qualls Early Learning Inventory (QELI)

Qualls Early Learning Inventory (QELI) is an observational tool for use in the primary grades to identify student development in six areas related to school learning. The Inventory observes behaviors developed in school so information from it can be used to focus instruction and improve achievement.

Head Start

Head Start and Early Head Start are comprehensive child development program which serve children from birth to age 5, pregnant women, and their families. They are child-focused programs and have the overall goal of increasing the school readiness of young children in low-income families.

Getting Ready for Kindergarten Calendar

The Family Calendar presents the kindergarten readiness indicators form the Arkansas Department of Education in "family friendly" language. The calendar runs from September through August.

Get Ready for School

The road to success in school begins early. Good health, loving relationships, parental guidance and praise, and many opportunities to learn, all help children do well later in life. Many simple things help our children grow, develop, and have fun learning.

- Encourage your children to want to learn and go to school.
 - Read aloud to your child daily. This gives your child a chance to learn about language, enjoy the sound of your voice, and be close to you.
 - Listen to your child. This is the best way to learn what's on his/her mind, what he/she knows and doesn't know, and how he/she thinks and learns.
 - Set a good example for your children. They will imitate what you do.
 - Teach your child to feel good about himself/herself and that he/she can succeed.
 - Help your child find ways to solve conflicts with siblings and friends.
 - Talk to your child daily about school activities and experiences.
 - Talk with teachers regularly, even when no problems exist.
 - Attend school activities
 - Let your child know that you admire her/him.
 - Communicate with your child about school, friends, hobbies, places he/she likes to go and things he/she likes to do.
 - Encourage your child to develop hobbies.
 - Be supportive of everything your child does.
